EMAIL: info@engineering.sdsu.edu

Associateships

Graduate teaching associateships and graduate assistantships in engineering are available to a limited number of qualified students. Application forms and additional information may be secured from the chair of the appropriate department.

General Information

The College of Engineering offers graduate study leading to the Ph.D. degree in engineering science/applied mechanics and Master of Science degrees in aerospace, civil, electrical, and mechanical engineering. The Ph.D. degree program is offered jointly with the University of California, San Diego. These curricula are designed to augment the student's undergraduate training by advanced study in one of the various fields of engineering. Recognizing the increasing importance in modern technology of the engineer-scientist team, San Diego State University has developed an academic program which offers to individuals holding a first degree in engineering, an opportunity to pursue advanced study in a specialized area of knowledge.

Section I. Master's Degree Programs

Master of Science Degree

Admission to Graduate Study

All students must satisfy the general requirements for admission to the Graduate Division with classified graduate standing as described in Part Two of this bulletin. Candidates for admission to aerospace engineering, civil engineering, electrical engineering and mechanical engineering programs must have attained a grade point average of at least 2.75 (where A equals 4) in the last 60 semester (90 quarter) units of technical study attempted in the undergraduate degree program. In addition, applicants must have a bachelor's degree in a field of engineering appropriate to the field in which they desire to earn an advanced degree or in a field closely related thereto from an institution acceptable to the College of Engineering and the Graduate Division. If undergraduate preparation is deemed insufficient, the student will be required to take specified courses for the removal of the deficiency. Such courses may be in addition to the minimum of 30 units for the master's degree in engineering.

Students should contact their specific engineering department for GRE test requirements. Letters of recommendation for graduate study are helpful but optional. Such letters should accompany the completed application form.

In addition to submitting the University application available at www.csumentor.edu, the College of Engineering requires the following materials to be submitted as a complete package (refer to the appropriate department section for the address to submit the department admissions package as well as for additional information).

- (1) Two sets of official transcripts (in sealed envelopes);
- (2) GRE scores;
- (3) Personal statement of graduate program goals.

Advancement to Candidacy

All students must meet the general requirements for advancement to candidacy as described in Part Two of this bulletin.

Specific Requirements for the Master of Science Degrees

In addition to meeting the requirements for classified graduate standing as stated above, the student must satisfy the basic requirements for the master's degree as described in Part Two of this bulletin. With the approval of the appropriate department, the student working toward the master of science degree may elect either Plan A, requiring a thesis and an oral defense, or Plan B, requiring a comprehensive written examination.

Students shall arrange their coursework, in conference with their graduate adviser, according to the following requirements for the specific degree.

Aerospace Engineering (Major Code: 09021)

General information: The Department of Aerospace Engineering and Engineering Mechanics offers graduate study leading to the Master of Science degree in aerospace engineering.

Students are encouraged to engage in thesis research or special study projects. Available areas of research include experimental, theoretical and computational aerodynamics and fluid mechanics, structural mechanics, fracture mechanics, composite structures, random vibrations, fluid-structure interactions, acoustics, and aircraft and spacecraft stability and control

Mail or deliver your complete admissions package to:

Professor A. Plotkin, Graduate Adviser
Department of Aerospace Engineering and
Engineering Mechanics
San Diego State University
5500 Campanile Drive
San Diego, CA 92182-1308

Specific requirements for the degree: The student's program prepared in conference with and approved by the graduate adviser, must satisfy the following requirements:

1. Twenty-one units of 600- and 700-numbered courses in aerospace engineering and/or engineering mechanics. At least one course must be outside the student's area of specialization.
2. Nine additional units of 500-, 600- and 700-numbered courses approved by the graduate adviser.

Areas of Specialization in Aerospace Engineering and Engineering Mechanics

1. **Aerodynamics/Astronautics**
 - AE 601. Computational Fluid Mechanics (3)
 - AE 612. Compressible Fluid Flow (3)
 - AE 620. Incompressible Aerodynamics (3)
 - AE 643. Laminar Flow (3)
 - AE 644. Turbulent Flow (3)
2. **Structural Mechanics**
 - EM 600. Seminar (1-3)
 - EM 603. Theory of Vibrations (3)
 - EM 611. Vibration of Elastic Solids (3)

- EM 621. Theory of Elasticity (3)
- EM 711. Structural Acoustics (3)
- EM 724. Theory of Plates and Shells (3)
- EM 727. Theory of Elastic Stability (3)

Civil Engineering

General information: The Department of Civil and Environmental Engineering offers graduate study leading to the Master of Science degree in civil engineering. Available areas of study include a concentration in environmental engineering and specializations in geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Programs of study may also include combinations of the above areas and related courses from other disciplines subject to the approval of the graduate adviser.

Applicants with a bachelor's degree in an approved non-engineering curriculum must make up the deficiencies in biology, calculus, chemistry, computer skills, differential equations, fluid mechanics and hydraulics, physics, statics and dynamics, statistics, and thermodynamics, as determined by the graduate adviser.

Mail or deliver your complete admissions package to:

Dr. B. Westermo, Graduate Adviser
 Department of Civil and Environmental Engineering
 San Diego State University
 5500 Campanile Drive
 San Diego, CA 92182-1324

**Concentration in Environmental Engineering
 (Major Code: 09221)**

Specific requirements for the concentration: The student's program, prepared in conference with and approved by the graduate adviser, must satisfy the following requirements:

1. A minimum of 21 units of coursework, and up to nine combined units of Research (ENV E 797), Thesis (ENV E 799A), and Special Topics (ENV E 798).
2. Eighteen units of 600- and 700-numbered courses in civil and environmental engineering.

Required courses:

- ENV E 554. Process Fundamentals of Environmental Systems (3)
- ENV E 645. Aquatic Chemistry for Environmental Engineers (3)
- ENV E 646. Microbiological Principles for Environmental Engineering (3)
- ENV E 647. Physical and Chemical Processes of Water Pollution Control (3)
- ENV E 648. Biological Processes and Bioremediation Engineering (3)

Electives:

- ENV E 553. Environmental Engineering Laboratory (3)
- ENV E 555. Water and Wastewater Engineering (3)
- ENV E 556. Air Quality Management (3)
- ENV E 558. Solid Waste Management (3)
- ENV E 560. Environmental Engineering Design (3)
- ENV E 637. Process Design for Industrial Waste Treatment (3)
- ENV E 797. Independent Research (1-3)
- ENV E 798. Special Study (1-3)
- ENV E 799A. Thesis or Project (3)
- ENV E 799B. Thesis or Project Extension (0)
- CIV E 632. Computational Hydraulics and Hydrology (3)
- CIV E 633. Environmental Hydrology (3)
- CIV E 634. Surface Water Hydrology (3)
- CIV E 638. Sedimentation and River Engineering (3)

Other electives may be arranged on an individual basis by the faculty adviser and the student.

A statistics course equivalent to Civil Engineering 160 and an introductory course in environmental engineering equivalent to Environmental Engineering 355 must be taken before or during the early stages of the program.

**Specializations in Civil Engineering
 (Major Code: 09081)**

Specific requirements for the specializations: The student's program, prepared in conference with and approved by the graduate adviser, must satisfy the following requirements:

1. Eighteen units of 600- and 700-numbered courses in civil engineering. A total of no more than three units from courses numbered 797, 798, and 799 may be used to satisfy this requirement.
2. A minimum of four courses should be selected from one of the specialty areas listed below; in exceptional cases, this requirement may be waived at the discretion of the graduate adviser, provided the substitute course is in the College of Engineering and enhances a coherent program in a specific professional area.
3. At least twelve additional units of 500-, 600- or 700-numbered courses, approved by the graduate adviser.

Areas of Specialization in Civil Engineering

1. Geotechnical Engineering

- CIV E 640. Advanced Soil Mechanics (3)
- CIV E 641. Advanced Foundation Engineering (3)
- CIV E 642. Groundwater Seepage and Earth Dams (3)
- CIV E 644. Soil Dynamics (3)

2. Structural Engineering

- CIV E 605. Prestressed Concrete Structures (3)
- CIV E 607. Dynamics of Structures (3)
- CIV E 608. Earthquake Engineering (3)
- CIV E 610. Finite Element Analysis of Structures (3)
- CIV E 612. Advanced Concrete Materials (3)

3. Transportation Engineering

- CIV E 620. Traffic Flow and Control (3)
- CIV E 621. Transportation Demand Analysis (3)
- CIV E 622. Mass Transit Engineering (3)
- CIV E 781. Seminar in Transportation Engineering (2 or 3)

4. Water Resources Engineering

- CIV E 632. Computational Hydraulics and Hydrology (3)
- CIV E 633. Environmental Hydrology (3)
- CIV E 634. Surface Water Hydrology (3)
- CIV E 638. Sedimentation and River Engineering (3)

**Electrical Engineering
 (Major Code: 09091)**

General information: The Department of Electrical and Computer Engineering offers graduate study leading to a Master of Science degree in Electrical Engineering. The program provides balanced opportunities to study practical engineering design and do research. Research assistantships are available in the research areas of computer engineering, digital system design, VLSI design, digital signal processing and communications systems, electro-optic system design and instrumentation, applied electron and molecular spectroscopy, power systems, and biomedical/rehabilitation engineering.

Mail or deliver your complete admissions package to:

Graduate Adviser
 Department of Electrical and Computer Engineering
 San Diego State University
 5500 Campanile Drive
 San Diego, CA 92182-1309

Specific requirements for the degree: The student's program, prepared in conference with and approved by the graduate adviser, must satisfy the following requirements:

1. Eighteen units of 600- and 700-numbered courses in electrical engineering.
2. At least six additional units of 500-, 600- or 700-numbered courses in the College of Engineering or, with the prior approval of the graduate adviser, in the College of Sciences.

3. Six elective units of 500-, 600- or 700-numbered courses approved by the graduate adviser.
4. Prerequisites for all courses taken for the degree must be completed with a grade of C or better.
5. As a breadth requirement, each classified graduate student is required to complete, with approval of the graduate adviser, at least one course from four of the following specialty areas: Communications, Computers, Electronics/Networks, Physical Electronics, Power/Control Systems. If the course content is appropriate, the graduate adviser may approve certain Electrical Engineering 596 courses to satisfy part of the breadth requirement.

Disciplines and related courses:

Communications: Computer Engineering 560, 565; Electrical Engineering 553, 556, 558, 650, 652, 653, 657, 658, 705.

Computers: Computer Engineering 561, 572; Electrical Engineering 672, 675, 676, 678, 679, 706.

Electronics: Electrical Engineering 502, 503, 530, 539, 570, 634.

Physical Electronics: Electrical Engineering 534, 540, 541, 546, 642, 644, 645.

Power/Control Systems: Electrical Engineering 520, 580, 581, 582, 583, 622, 680.

6. Students selecting Plan B must pass a written comprehensive examination. The examination tests the students' understanding and mastery of *fundamental principles* and their ability to apply them to engineering problems. Members of the ECE faculty will grade the comprehensive examination for technical correctness, completeness, and clarity of expression. After two unsuccessful attempts, the student may not take the examination again without written permission from the graduate adviser. The adviser may require the student to successfully complete certain additional courses before taking the comprehensive examination a third and final time.

Mechanical Engineering (Major Code: 09101)

General information: The Department of Mechanical Engineering offers graduate study leading to the Master of Science degree in mechanical engineering.

Available opportunities for thesis research and special study projects include heat transfer, thermodynamics, fluid mechanics, mechanical design which includes vibration, controls, CAD/CAM and robotics, materials, optimization and bioengineering.

Mail or deliver your complete admissions package to:

Dr. Subrata Bhattacharjee, Graduate Adviser
Department of Mechanical Engineering
San Diego State University
5500 Campanile Drive
San Diego, CA 92182-1323

Specific requirements for the degree: The student's program, prepared in conference with and approved by the graduate adviser, must satisfy the following requirements:

1. Twenty-one units of 600- and 700-numbered courses in mechanical engineering to include 12 units in one area of specialization (designated as Group A and Group B) and Mechanical Engineering 797 or alternative courses subject to approval of graduate adviser.
2. Nine additional units of 500-, 600- and 700-numbered courses approved by the graduate adviser.

Areas of Specialization in Mechanical Engineering

Group A: Thermal Sciences

- ME 651. Advanced Thermodynamics (3)
- ME 661. Gas Dynamics (3)
- ME 663. Boundary Layers in Internal Flows (3)

- ME 671. Conduction of Heat and Mass Transfer (3)
- ME 675. Radiation Heat Transfer (3)

Group B: Engineering Design

- ME 610. Finite Element Methods in Mechanical Engineering (3)
- ME 614. Engineering Design: Analytical Methods (3)
- ME 621. Mechanical Vibrations (3)
- ME 632. Advanced Topics in Automatic Controls (3)
- ME 645. Mechanical Behavior of Engineering Materials (3)

Master of Engineering Degree

(Major Code: 09134)

General Information

The Master of Engineering degree in Manufacturing and Design is a practice-oriented, interdisciplinary degree designed to meet the needs of students who are interested in furthering a career in engineering with a business/management emphasis. The student will select his/her own program in consultation with the Department of Mechanical Engineering graduate adviser subject to the guidelines listed below. In addition to the course requirements, the student will be required to complete a design project and a final written report. This phase of the program will be used to initiate the student to the problems and solutions that a practicing engineer will face. The program is aimed at the industrial employee who is seeking a career enhancement and also to the new baccalaureate graduate who wants to continue to study to be able to enter the work force with well-defined professional skills.

Admission to Graduate Study

All students must satisfy the general requirements for admission to the Graduate Division with classified graduate standing as described in Part Two of this bulletin. Candidates must have attained an undergraduate grade point average of at least 2.75 (4 point scale) in the last 60 semester (90 quarter hours) of technical study. In addition, applicants must have a bachelor's degree in mechanical engineering or a closely related discipline. If undergraduate preparation is deemed insufficient, the student will be required to take specified undergraduate courses to remove this deficiency. Such courses may be in addition to the 36 units required. Admission to the program will be limited to applicants who will have a background, interest, and expertise consistent with the demands of the design projects.

Specific Requirements for Master of Engineering Degree

The student's program, prepared with the approval of the graduate adviser, consists of 30 units of coursework, of which no more than six units may be in 500-level courses, and six units of design project. Eighteen units will be in manufacturing and design, 12 units will be from Business Administration: Finance, Information and Decision Systems, Management, and Marketing areas; and six manufacturing and design project units as indicated:

Graduate Courses in Mechanical Engineering (18 units)

- ME 540. Nonmetallic Materials (3)
- ME 542. Manufacturing with Nonmetallic Materials (3)
- ME 544. Advanced Manufacturing Processes (3)
- ME 546. Computer Aided Manufacturing (3)
- ME 570. Thermal Systems Analysis and Design (3)
- ME 610. Finite Element Methods in Mechanical Engineering (3)
- ME 614. Engineering Design: Analytical Methods (3)
- ME 621. Mechanical Vibrations (3)
- ME 632. Advanced Topics in Automatic Controls (3)
- ME 645. Mechanical Behavior of Engineering Materials (3)
- ME 651. Advanced Thermodynamics (3)
- ME 661. Gas Dynamics (3)

- ME 663. Boundary Layers in Internal Flows (3)
 ME 671. Conduction of Heat and Mass Transfer (3)
 ME 675. Radiation Heat Transfer (3)
 ME 696. Advanced Topics in Mechanical Engineering (2 or 3)
 EM 603. Theory of Vibrations (3)
 EM 611. Vibration of Elastic Solids (3)
 EM 621. Theory of Elasticity (3)
 EM 711. Structural Acoustics (3)
 EM 724. Theory of Plates and Shells (3)
 EM 727. Theory of Elastic Stability (3)

Graduate Courses in the College of Business Administration (12 units)

- BA 651. Organizational Behavior (2)
 BA 653. Managerial Economics (2)
 BA 655. Marketing (3)
 BA 662. Operations Management (2)
 BA 665. Financial Management I (3)
 FIN 617. Financial Management II (3)
 IDS 609. Management Information Systems (3)
 IDS 686. Database Management Systems (3)
 IDS 744. Seminar in Quality and Productivity Management
 IDS 750. Project Management (3)
 IDS 753. Global Supply Chain Management (3)
 MGT 721. Seminar in Group Processes and Leadership (3)
 MGT 724. Entrepreneurship (3)
 MKT 761. Product Innovation Management (3)

Project – Six units of a design project (ME 797 or 799) to be selected in cooperation with the graduate adviser in the area of interest. The project will be specifically designed to address both the technical and economic aspects in the solution of an engineering problem. A formal written report of project findings will be submitted to and approved by a committee of two engineering faculty members and one faculty member from business administration prior to graduation.

Section II. Doctoral Program

Engineering Sciences/Applied Mechanics

(Major Code: 09012)

The cooperating faculties of the College of Engineering at San Diego State University and the Department of Mechanical and Aerospace Engineering at the University of California, San Diego offer a joint doctoral program in engineering sciences/applied mechanics. The Doctor of Philosophy degree is awarded jointly by the Trustees of The California State University and the Regents of the University of California in the names of both cooperating institutions.

The Ph.D. degree is a research degree and represents both attainment of advanced knowledge and demonstration of research skills. It is not awarded solely for the fulfillment of technical requirements such as academic residence and coursework. A typical student with an appropriate bachelor of science degree in engineering may complete the joint program in five to six years of full-time study and research. A student with advanced standing may complete the program in a shorter period of time.

The research interests of the participating faculty members cover a wide range of subjects including: acoustics, biomechanics, boundary layer separation, boundary layer stability, computational fluid mechanics, combustion, experimental fluid mechanics, finite element methods in structural analysis, flow field acoustic interaction, gas physics, hydrology, hypersonic flow field, low speed aerodynamics, material science, material processing, soil mechanics, structural fluid interaction, and two phase flows, and all aspects of environmental engineering, including development and application of air, water, and soil pollution control methods.

At SDSU, the major areas of research at the graduate level and the participating faculty members that constitute the Graduate Group in Applied Mechanics include:

Acoustics: M. Pierucci

Aerodynamics: J. Katz, A. Plotkin

Bioengineering: K. May-Newman, A. Szeto

Combustion: S. Bhattacharjee

Computational Mechanics: T. Impelluso, J. Katz, R. Kline, E. Olevsky, V. Ponce, N. Sharabi, K.C. Wang

Environmental Engineering: M. Guroi

Experimental Mechanics: Z. Bayasi, R. Kline

Fluid Mechanics: J. Katz, N. Nosseir, A. Plotkin, K.C. Wang

Hydrology: H. Chang, V. Ponce

Material Engineering: Z. Bayasi, J. Burns, B. Westermo

Robotics and Controls: G. Lee

Soil Mechanics: B. Westermo

Structure and Fluid Interactions: M. Pierucci, B. Westermo

Structural Mechanics: Z. Bayasi, M. Pierucci, N. Sharabi, B. Westermo

Thermal Sciences: S. Bhattacharjee

Financial Support

Students admitted to the program will be eligible for teaching associateships and graduate assistantships. It is the policy of SDSU College of Engineering to support doctoral students during their entire tenure as long as they are in good standing, are making satisfactory progress toward their degree, and are in residence at one of the two institutions.

For further information, the student should write to the Director of the Engineering Sciences/Applied Mechanics Joint Doctoral Program at the College of Engineering, San Diego State University, San Diego, CA 92182-1326.

PROGRAM

Preparation for Admission

Applicants must have an acceptable bachelor's degree or master's degree and must meet the requirements for admission to both SDSU and UCSD. A minimum grade point average of 3.0 in the major field for students with the B.S. degree or 3.4 for students with the M.S. degree is required. Students are expected to have engineering degrees in the classical engineering sciences/applied mechanics areas (i.e., aerospace, chemical, civil, environmental, mechanical). Students with degrees in one of the allied fields (i.e., physics, mathematics, electrical engineering, and engineering physics) will be required to remove any academic deficiencies by completing a series of courses normally required of the students who have academic degrees in the applied mechanics areas.

APPLICATIONS FOR THE PH.D. PROGRAM IN ENGINEERING SCIENCES/APPLIED MECHANICS MUST BE RECEIVED NO LATER THAN FEBRUARY 15.

Application

Students seeking admission to the joint doctoral program in engineering sciences/applied mechanics should write directly to the Doctoral Program Director requesting application materials. A complete application requires the following:

The appropriate completed application forms completed with application fees.

Three letters of recommendation.

An official transcript of academic work completed at all institutions attended.

Acceptable scores on both the qualitative and the quantitative sections of the Graduate Record Examination General Test (GRE).

The faculty of the joint doctoral program on each campus will rec-

ommend admission of acceptable applicants to the graduate deans at SDSU and UCSD. Entry occurs when the student is formally accepted by both graduate deans and the student is officially notified of the acceptance.

Residency Requirements

The student must spend at least one academic year in full-time residence at each of the two institutions. The definition of such residence must be in accord with the regulations of the Graduate Divisions of SDSU and UCSD.

Advising Committee

When a student is admitted to the joint doctoral program, the chair of the Department of Mechanical and Aerospace Engineering at UCSD and the director of the joint doctoral program in engineering sciences/applied mechanics at SDSU will appoint a three-member advising committee consisting of at least one member from each institution. It is the responsibility of this committee to develop in consultation with the student a course of study and a plan of preparation for the doctoral qualifying examination, which should be taken as soon as possible after the two years of study at the two institutions. Students with advanced standing may be capable of taking the examination earlier. Upon the student's successful completion of the examination, the advising committee will recommend to the chair of the Department of Mechanical and Aerospace Engineering at UCSD and the director of the joint doctoral program at SDSU, the membership of the student's doctoral committee. Upon appointment, this committee will supersede the advising committee and be responsible for the student's program of study and dissertation research.

Course Requirements

The Doctor of Philosophy degree in engineering sciences/applied mechanics is a research degree and represents both attainment of advanced knowledge and demonstration of research skills. Therefore, no specific course requirements for the joint doctoral program exist; however, the doctoral qualifying examination is based on a certain level of competence in the general areas of: (1) fluid mechanics, (2) solid mechanics, and (3) applied mathematics. Preparation for the examination is normally done through coursework in these areas.

Qualifying Examinations

Joint Qualifying Committee

The doctoral program qualifying examination is administered by the student's advising committee supplemented, if appropriate, by faculty appointed by the chair of the Department of Mechanical and Aerospace Engineering at UCSD and the director of the joint doctoral program at SDSU. The examination will be oral, will cover at least four areas selected to ensure appropriate competence in the general area of applied mechanics, and will be at the level and content of the SDSU and UCSD graduate courses. The specific areas will be approved in advance by the chair of the Department of Mechanical and Aerospace Engineering at UCSD and the director of the joint doctoral program at SDSU. One of the areas may be satisfied by completing a series of courses in the area with at least a B grade in each course.

Joint Doctoral Committee

Upon successful completion of the doctoral qualifying examination, a doctoral committee shall be appointed by the graduate deans of SDSU and UCSD upon the recommendation of the chair of the Department of Mechanical and Aerospace Engineering at UCSD and the director of the joint doctoral program at SDSU. The doctoral committee shall supervise the continued study and research programs of the student. The chair of the committee is the primary adviser of the student's dissertation research. The dissertation committee will con-

sist of three members from each institution; one of the three will be from outside of the Department of Mechanical and Aerospace Engineering and one from outside the student's major area.

Senate Qualifying Examination

The major requirement for the doctorate is the completion of a dissertation based on original research, which contributes new knowledge to the fields. The Senate Qualifying Examination consists of a presentation of initial dissertation results and plans for future research. The chair of the doctoral committee will determine in consultation with the student when the Senate Qualifying Examination will be held. Approval of a student's dissertation topic by the doctoral committee implies that the committee believes that the work will contain the potential for one or more articles publishable in refereed journals.

Dissertation

The doctoral committee will administer the final examination, which will consist of the student's presentation and defense of the dissertation, with particular emphasis on the principal findings and areas of future research. The first part of this examination is open to the public; a concluding portion involves appropriate questioning of the student by the committee.

The detailed requirements concerning the preparation of the dissertation, the number of copies, the editorial style, etc., are set forth in the UCSD document entitled "Instructions for the Preparation and Submission of Doctoral Dissertations and Masters' Theses." Acceptance of the dissertation by the University Librarian at UCSD and the Graduate Division at SDSU represents the final step in completion of the student's degree requirements.

Satisfactory Progress

The students admitted to this program are expected to make continuous, satisfactory progress and to remain in good standing at both institutions.

Award of the Degree

The Doctor of Philosophy degree in engineering sciences/applied mechanics will be awarded jointly by the Trustees of The California State University and the Regents of the University of California in the names of both cooperating institutions.

Faculty

The following faculty members of the cooperating institutions participate in the joint doctoral program in engineering sciences/applied mechanics and are available for direction of research and as members of joint doctoral committees.

San Diego State University:

Program Director: Gordon K. F. Lee

Committee Members:

J. Katz, N. Nosseir, M. Pierucci, A. Plotkin, K.C. Wang (Aerospace Engineering and Engineering Mechanics).
Z. Bayasi, H. Chang, M. Gurol, V. Ponce, N. Sharabi, B. Westermo (Civil and Environmental Engineering).
A. Szeto (Electrical and Computer Engineering).
J. Castillo, M. Tarokh (Computer Science).
S. Bhattacharjee, J. Burns, T. Impelluso, R. Kline, K. May-Newman, E. Olevsky (Mechanical Engineering).

University of California, San Diego:

Program Director: P. Linden

Committee Members:

R. Bitmead, J. Goddard, S. Krasheninnkov, P. Linden, X. Markenscoff, M. Meyers, C. Pozrikidis, J. Talbot, F. Williams (Mechanical and Aerospace Engineering).

Section III. Other Programs

Rehabilitation Technology Certificate

The purpose of this certificate is to train interested engineers and non-engineers in the field of rehabilitation technology using formal classroom instruction, project design and fabrication, and internship. Enrollment in this certificate program will provide interested engineering students exposure to rehabilitation technology. For non-engineering rehabilitation professionals (e.g., vocational rehabilitation counselors, special education teachers, transition and supported employment specialists), the certificate program will provide specialty training in the application of rehabilitation technology. Specifically, the certificate program will do the following:

1. Expose graduate engineering students to the problems and promises of rehabilitation engineering as a field of specialization.
2. Provide a number of interrelated training activities that will improve the professional competence of employed rehabilitation workers.
3. Provide opportunities for extensive training, in the form of extended internships with knowledgeable rehabilitation professionals whose backgrounds are in such specializations as communicative disorders, rehabilitation engineering, physical and occupational therapy, rehabilitation electronics, prosthetics and orthotics, rehabilitation counseling, special education, biomechanics, etc.
4. Offer both formal classroom instruction and guided problem solving opportunities in designing, building, customizing, and delivering rehabilitation technology for enhancing the integration of individuals with disabilities into school, residential, community, and employment settings.

This is an advanced trans-disciplinary academic certificate at the postbaccalaureate level. Admission requirements include a bachelor's degree in engineering, rehabilitation, or special education, or a related allied health field. Students admitted into the program must maintain a minimum grade point average of 3.0 in all certificate coursework with no less than a grade of "C" in all courses. Depending on the background and work experience, students may be required to remove deficiencies through additional coursework as part of the certificate requirements.

Students in the certificate program will complete 12 units of formal coursework and one semester of internships as described below unless alternative courses are approved by the program advisers.

Electrical Engineering 502 (*Electronic Devices for Rehabilitation—3 units*) will acquaint students with the design and application of electronic devices used in rehabilitation; explain the problems of the disabled; and present possible solutions for some of their needs. This is a non-traditional and practical electrical engineering course that requires student involvement in the collaborative assessment (with students in Communicative Disorders 676) of disabled persons for their cognitive, communicative, and physical abilities at the SDSU Communications Clinic.

Administration, Rehabilitation and Postsecondary Education 607 (*Applications of Rehabilitation Technology—3 units*) will provide an overview of assistive technology in the areas of assessment, accessibility, mobility, communication, employment, and more. Students will collaborate on transdisciplinary teams to design and construct an adaptation or modification which will enable a person with disabilities to participate more fully in school, work and/or community environments.

Administration, Rehabilitation and Postsecondary Education 685A or 685B (*Medical and Psychological Aspects of Disability—3 units*) will cover the impact of different disabilities (e.g. visual and sensory impairments, orthopedic impairments, burns, amputation, chronic pain, cancer, developmental and learning disabilities, traumatic brain injuries, and spinal cord injuries) in terms of functional limitations, rehabilitative services needed, and environmental adjustments required.

Electrical Engineering 798 (*Special Study in Rehabilitation Technology Design—3 units*) will provide students hands-on opportunities to work with rehabilitation professionals, occupational and physical therapists, and other non-engineers on technology teams in the design and fabrication of customized adaptations for persons with disabilities.

Internships (one semester) will provide guided field experience through placement with knowledgeable practicing rehabilitation professionals in such settings as the Sharp Rehabilitation Center, Assistive Device Assessment Program within SDSU's Communications Clinic, Access Center of San Diego, and San Diego schools.

For application and additional information, contact the program adviser Dr. Andrew Szeto in the Department of Electrical and Computer Engineering or Dr. Caren L. Sax in the Department of Administration, Rehabilitation, and Postsecondary Education.

Courses Acceptable on Master's Degree Programs in Engineering (ENGR)

UPPER DIVISION COURSE

510. Methods of Analysis (3) I, II

Prerequisite: Engineering 280 with minimum grade of C.

Selected topics from vector calculus, partial differential equations, and complex analysis, with engineering applications.

Courses Acceptable on Doctoral Degree Program in Engineering (ENGR)

In addition to the courses listed below, a number of other graduate level courses are acceptable for the doctoral degree. For a description of these courses, see individual department listings (e.g., aerospace, civil and environmental, or mechanical), and contact the director of the doctoral program.

GRADUATE COURSES

800. Seminar (1) Cr/NC

Prerequisite: Admission to the doctoral program.

Doctoral students are expected to attend a weekly seminar dealing with current topics in different areas of applied mechanics. Course is to be taken every semester.

810. Colloquium in Engineering Sciences (1) Cr/NC/RP

Prerequisite: Admission to the doctoral program.

Discussions on advances in research in engineering science/applied mechanics conducted by SDSU and UCSD faculty.

896. Doctoral Laboratory and Computer Research (1-3) Cr/NC/RP

Prerequisite: Admission to the doctoral program.

Independent research in laboratory and computer settings in the areas of applied mechanics. Content to be determined after consultation with adviser.

897. Doctoral Research (1-15) Cr/NC/RP

Prerequisite: Admission to the doctoral program.

Independent research in general areas of applied mechanics. Content to be determined after consultation with adviser.

898. Doctoral Special Study (1-3) Cr/NC/RP

Prerequisite: Advancement to candidacy.

Individual study leading to study and research required for doctoral dissertation.

899. Doctoral Dissertation (3-15) Cr/NC/RP

Prerequisites: An officially constituted joint doctoral committee and successful completion of Senate Qualifying Examination.

Final research and preparation of dissertation for doctoral degree. Enrollment required during term in which dissertation is approved.
